

State-of-the-art Gutters and Profiles

for Greenhouses

Primo supplies international, market leading companies with custom-made solutions for greenhouses:

- **Ready-to-use PVC gutters** in custom sizes, shapes, materials, and colours. Pre-drilled holes and end cups/covers can be integrated in the solution.
- **Biodegradable clips** for protecting the growth of young fragile plants
- **Protective and insulating profiles**, like glazing beads and gaskets for windows and doors, finishing profiles for interior design, curtain cassettes, and many more tailored interior and exterior profiles
- **Custom-made lighting solutions** including busbars for lighting tracks, diffusers, linear lenses, tubes and covers.

ADVANCED EXTRUSION TECHNOLOGY IMPROVES YOUR PRODUCT.

Primo helps you choose the right material to optimise product lifetime, thermal properties, stability, temperature and UV resistance.

With a Primo profile you can get a sustainable solution:

- 100% custom design
- Durable
- Lightweight
- Easy to install
- UV and temperature resistant
- Excellent insulation properties
- Can be recycled or bio-based

Optimise performance. Save resources.

PROFILES OF TOMORROW

Working with Primo, you will get a:

GLOBAL BUSINESS PARTNER

Primo is a reliable business partner with decades of experience working together with the leading greenhouse growers. Primo is a Danish, family-owned company consisting of production units in Europe and Asia ready to serve you.

MATERIAL SPECIALIST

Primo uses high-quality raw material and grades dedicated for your business and always fulfilling the industry's standards and special requirements.

DESIGN AND INNOVATION EXPERT

Through our material and extrusion technology know-how we support you in the development process. Our experts are at your full disposal – improving your projects through close collaboration between our material engineers and your technicians/project managers.

ONE STOP SHOP

Primo does not only design and manufacture tailored polymer profile solutions; our in-house tooling competence centre guarantees optimal performance of the tools and the manufacturing process, and we offer inline machining, finishing as well as packaging solutions to save resources in the assembly process.

RESPONSIBLE SUPPLIER

We are committed to help customers reduce their Co2 emissions. We will do so by optimising our production process to reduce material and resource usage and by investing in sustainable solutions. Together with customers and suppliers we will drive innovation in sustainable materials and designs and increase the uptake of recycled and renewable materials.
