

MATERIAL KNOWLEDGE

Primo develops profiles for windows and doors that meet tomorrow's demands for quality and energy efficiency and provides you with the latest technologies and future-proof materials and designs. Not only do we deliver specialised profiles to individual projects, we can also operate as a full window and door frame systems provider, with you all the way, from the very first drafts, to the final, completed window/door frame system.

Our substantial experience allows us to guide you in finding the right material for your window projects.

Primo's range of materials covers everything from traditional plastic types such as PVC and ABS, to blends and composites with outstanding durability, stability and heat retention capabilities.

Our aim is to ensure that your products achieve outstanding energy-saving and cost-effective properties.

All of our products are based on decades of specialist know-how.

PRIMO – WE THINK THE WORLD OF PLASTICS

Primo is an international group of companies with one thing in common: A passion for plastics extrusion.

From our beginnings in Denmark, producing profiles for windows and doors and for building and decoration purposes, our knowledge of plastics and extrusion has led us to diversify into a number of exciting sectors, including construction, medical equipment, transportation, energy, power and lighting, white goods and the

offshore sector. In all of our business areas we supply many different industries with extruded, co-extruded and triple-extrusion plastics for a multitude of applications.

We are a reliable and dedicated partner with decades of experience in the development of profiles for the global windows and doors industry. We believe in long-lasting relationships with our customers based on honest and open dialogue, and we are always at hand with support for your sales and marketing operations.

Today, the Primo Group consists of companies throughout Europe and in China.

Our quality control systems cover continuous inspection of functions and scanning of measurements.

Quality laboratory tests include:

- Welding strength testing
- Drop ball testing
- Shrinkage inspection
- Charpy impact testing
- Colour measurement

FACADE CONSTRUCTION

- Glass seals
- Gaskets for horizontal division
- Glass supports
- Insulation profiles

MUCH MORE THAN JUST PROFILES

Primo is a world-leading supplier of extruded plastic profiles for windows and doors.

We work with customers ranging from small, specialised window producers to major international producers. We deliver assistance and partnership all through the process, right from the very first ideas to the final profile or profile system, including logistics and service setups.

YOUR DEVELOPMENT PARTNERS

With our strong project management expertise, we act as sparring partners throughout the development process. Our specialist staff will bring our deep understanding of the windows and doors business to your project. We have our own in-house engineering department manned with plastics and extrusion experts, and our tooling workshops and laboratories can assist your own staff, whenever needed, with advice tests and prototypes.
